

PROFILE

Junior Developer and third-year Computer Engineering student with a strong focus on web development. Experienced in building modern web applications using Next.js and TypeScript, with additional exposure to back-end systems, databases, and Android development. Interested in developing scalable, user-centred software and expanding expertise in Artificial Intelligence and algorithms.

ACCOMPLISHMENTS

- Built and delivered multiple production-ready web applications using Next.js and TypeScript
- Applied AI search and optimization techniques (CSP, A*) to solve real-world planning problems
- Designed and implemented scalable front-end and full-stack architectures, including API development and data integration
- Worked across the full software lifecycle: requirements, design, implementation and deployment

EDUCATION

IADE - Creative University

Bachelor's Degree in Computer Engineering | Sept 2023 – Jun 2026

- Foundations in C programming and relational databases (SQL)
- Coursework in Distributed Systems and Artificial Intelligence algorithms
- Fundamentals of web application development
- UX/UI design, with focus on usability and functional interface creation
- Android mobile development using Kotlin
- Backend development with Java and Spring Boot

LANGUAGES

Portuguese -- Native, English – (B2/C1)

PROJECTS

GCO - Ginásio Clube de Odivelas Website | Lisbon | Jul 2025 – Present

Full-stack Developer | Next.js | Typescript | UI/UX

- Developed a production-ready full-stack web application focused on performance, scalability, and user experience
- Translated business and user requirements into a modern, responsive platform
- Built reusable UI components and implemented server-side logic and API endpoints using Next.js
- Integrated frontend and backend services with strong type safety and maintainable architecture

Better Flights - Academic Project | Lisbon | Sept 2025 – Dec 2025

Software Developer | Academic Project | Next.js, TypeScript, AI, CSP, A*, Kubernetes, PostgreSQL,

- Built an intelligent flight-planning platform using AI search and optimization algorithms
- Modeled travel planning as a Constraint Satisfaction Problem (CSP) and implemented the A* algorithm
- Designed a scalable architecture with hybrid data persistence (PostgreSQL & MongoDB)
- Implemented secure authentication and social features for itinerary sharing and reviews
